### DETAILED ACTION

Claims 1-5 are under examination.

Priority is set to the filing date April 22, 2002.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 2, the term "continuous process" is indefinite without the mention of the process.

Claim 5 is vague and indefinite for not pointing out the exact method of extraction of gelatin, i.e., claim 5 should refer to anyone of claims 1 through 4.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 -5 are rejected under 35 U.S.C. 102(b) as being anticipated by Haack et al.

(*Fleisch* 1984, 38 (1) 10-12; (3) 58-60). Haack et. al. teach that defatted pork rind granules are useful in the manufacture of gelatin (claims 1-5).

Art Unit: 1653

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

At page 1, paragraph 1, applicant admits that gelatin is conventionally prepared by chopping rind in to pieces, hydrolyzing the chopped rind with acid, neutralizing the acid hydrolyzed rind and exactrating the gelatin with water.

At page 1, paragraph 3, applicant states that his method includes defatting the rind before acid hydrolysis.

Haack *et. al.* teach defatting pork rinds into granules and suggest using these defatted rind granules for the manufacture of gelatin.

It would have been obvious to person having ordinary skill in the art to use the defatted pork rind granules taught by Haack *et. al.* to produce gelatin using conventional methods as described by the applicants, because, Haack *et. al.* teach that defatted pork rind granules are useful in the manufacture of gelatin (claims 1-5).

No Claims are allowed.
